

```
#include<stdio.h>

int main(){
    char numberPlate[2][7];
    _Bool act=0;
    while (scanf("%s",numberPlate[act])!=EOF){
        act=1-act;
        if(act==0){
            // Call your string compare function here on numberPlate[0] and
numberPlate[1].
        }
    }
    return(0);
}
```
